4-WHEEL ELECTRICAL LIFTING TROLLEY

Very easy to use:

- Electrical driving, forward and backward.
- Speed control.
- Working platform is changed manually.

Main features:

- **Forward or reverse movement while pressing the pedal**, so hands are free to work. Smooth steering, acceleration and braking.
- **All-terrain traction.** Special width wheels for sandy or hard grounds.
- **Battery charge indicator.**
- **Automatic battery charger.** Charge the batteries in the night-time and, when fully charged, they get automatically disconnected from the power supply.
- **Clutch** for moving the trolley if battery is dead.
- **Telescopic steering-wheel and railing** to be adapted to each working height.
- **Easy rear access** from any rung of the ladder to the working platform.
- Easy to transport using a forklift.

Dimensions and weight:

- Total length: 208 cm.
- Platform width: 70 cm.
- External width on-wheels: 82 cm.
- Min. platform height: 85 cm.
- Max. platform height: 200 cm.
- Max. working height: 400 cm.
- Weight: 273 kg.

Motor:

- Power: 0,56 kW (0.75 cv)
- Maximum revolutions 2000 rpm
- Tension: 24 V DC
- Intensity: 22 A.

Batteries:

- 2 batteries in series.
- Tension: 12 V
- Capacity 148 Ah

Battery charger:

- 230v – 50/60 Hz
- 24v - 20 A
- Automatic.
