

Quality treatment:

- Homogeneous treatment
- High manoeuvrability
- Costs saving
- Recommended for strawberries cultivation

Main Features:

- Totally homogeneous treatment, from first to last plant. Adaptable within crop features.
- **Extensible axes** to adapt to the cultivation of strawberries in tunnels of 4, 5, 6 or 7 rows.
- The Zancudo has an air turbine to pulverize the water drops, creating a mist with optimum penetration into the foliar density.
- The air is channelled through a pipe, so each nozzle has its own air pipe. This way we have an homogeneous air curtain along side the complete height of the plant.
- High manoeuvrability: **4-wheel drive and steering**. Reduced steering angle thanks to the innovative 4-wheel steering system.
- Nozzles with **triple flow**. It allows selecting different flows depending on the application we want to make.
- Extendable bars by sections. Different spray widths and heights depending on the type of crop.
- Height adaptable spaying bars.
- 500 liters tank with automatic hydro-loading device.

Measures:

- Ground Clearance: 800 mm
- Wheel Track Adjustment: 2000mm–2600mm
- Boom Adjustment Height: 700 mm–1300 mm
- Overall Height: 2250 mm
- Overall Length: 4181 mm

Technical features:

- Maximum spraying flow : 50 l to 40 bar.
- Hydrostatic transmission.
- Maximum speed: 9 km/h.
- Maximum surmountable slope: 50%.
